LEARNER'S ACTIVITY SHEET IN CAPSTONE RESEARCH

Topic:	Scientific Literature	Week No:	
Quarter:	3 rd Quarter	Lesson No:	

NAME: Buendicho, John Lamuel T.
GRADE AND SECTION: XII-Darwin

DATE ACCOMPLISHED: 03-09-23
Group No.: _____

Activity: Learn From this.

Directions: Answer the following questions in complete sentences.

Questions:

1. 1. What is the tagline of the Google Scholar? Stand on the shoulders of giants.

2. What is an open access? the unrestricted right or opportunity to use or benefit from something, in particular academic writing or research.(oxford dictionary).

3. Differentiate open access to non-open access journal articles.

Open access journal articles are journal articles that are accessible to the general public, whilst non-open access ones are generally proprietary.

4. Give sample of considered giant indexes.

Examples of such indexing databases in research are Directory of Open Access Journals (DOAJ), Scopus, and Web of Science.

5. What makes google scholar different from other indexes?

A primary benefit of Google Scholar is that, unlike other databases, its search functionality focuses on individual articles, not entire journals.

6. What is scientific research article? A scientific article is a text based on evidence that can support a hypothesis with original research.

7. What is the importance of scientific research articles? These keep record of new ideas and findings in different fields, which lets us keep an accessible archive of knowledge.
